1 Introduction

Information regarding the background, history and administration for the Pacific halibut and sablefish Individual Fishing Quota (IFQ) Program is available on the NOAA Fisheries Alaska Region website at <https://www.fisheries.noaa.gov/alaska/sustainable-fisheries/pacific-halibut-and-sablefish-individual-fishing-quota-ifq-program>.

1.1 IFQ Regulatory Changes

A complete list of regulatory amendments modifying the IFQ Program is available on NOAA Fisheries Alaska Region website at: <https://www.fisheries.noaa.gov/action/individual-fishing-quota-ifq-program-alaska-federal-register-rules-and-notice-2004-present>. No changes to the IFQ Program rules took effect in 2024.

1.2 Contacts

For information or questions about regulations and the rulemaking process, please contact the Sustainable Fisheries Division at 907-586-7228

For questions about permits or transfer applications, please contact Restricted Access Management Program (RAM) at (800) 304-846 option #2 or (907) 586-7474 or by email at RAM.Alaska@noaa.gov.

2 IFQ Harvest

2.1 Allocations and landings of IFQ halibut

The following table and figures present the participation and harvest for halibut IFQ. Similar tables broken out by IFQ area and covering the 2015-2024 period are presented in the appendix of this document (Table 4-1, appendix). The number of vessels and permits active in the halibut IFQ fishery decreased in 2024 to the lowest level of participation in the recent 5-year period. The percent of IFQ

harvested for halibut IFQ was 66%, the lowest utilization on record. The total harvest was 14.0 million pounds in 2024, the lowest amount on record.

Table 2-1 Total Halibut IFQ Landings and Participation 2020-2024

Area	Total IFQ Harvest	IFQ Catch Limit	% of Catch Limit Harvested	Vessels with Landings	Permits with Landings
2024	14,022,113	17,295,931	66.0%	639	1,689
2023	15,125,658	17,805,947	75.5%	690	1,791
2022	17,573,383	20,297,912	79.4%	732	1,891
2021	17,253,108	18,569,500	87.8%	729	1,725
2020	15,003,309	16,079,152	90.3%	746	1,751

Figure 2-1 Percent of Halibut IFQ Landed by Area 2015-2024

Figure 2-2 Number of Vessels Landing Halibut IFQ by Area 2015-2024

Figure 2-3 Total Halibut IFQ Landed by Area 2015-2024 (millions of pounds)

2.2 Allocations and landings of IFQ sablefish

The following table and figures present the participation and harvest for sablefish IFQ. Similar tables grouped by IFQ area for the 2015-2024 period are presented in the appendix of this document. Figure 2-4 indicates that the percentage of sablefish TAC harvested. In 2024 the overall sablefish utilization was at 59%, the lowest amount recorded over the last ten years (Table 4-2, appendix). The Aleutian Islands reached the lowest point for any area on record at 4.2%. The number of vessels and permits that participated decreased from 2023 with vessels at the lowest recorded, permits issued were slightly higher than 2020. The total harvest of sablefish was the third highest amount on record next to 2022 and 2023.

Table 2-2 Total Sablefish IFQ Landings and Participation 2020-2024

Area	Total IFQ Harvest	IFQ Catch Limit	%Harvested	Vessels	Permits
2024	36,526,971	60,790,486	59.0%	255	600
2023	37,436,394	62,040,419	61.9%	275	644
2022	42,108,671	56,401,864	74.4%	273	685
2021	32,715,915	43,444,034	72.6%	271	625
2020	22,736,966	31,707,405	66.3%	266	599

Figure 2-5 Number of Vessels Landing Sablefish IFQ by Area 2015-2024

Figure 2-6 Total Sablefish IFQ Landed by Area 2015-2024

2.3 Hired Skipper Activity

The tables and figures in this section show the number of hired skippers (HS) and the pounds of IFQ landed by hired skippers, compared to the total IFQ pounds landed. A hired skipper is a person who operates a vessel and harvests IFQ on behalf of a quota share (QS) holder. The amounts shown are held by individuals in the quota class B, C or D. Class A quota is not included as that class is able to use hired skippers without restriction and often owned by corporations. The percent of landings by hired skippers continues to show a downward trend, as does the number of active hired skippers. Tables that present hired skipper activity by management area are available in the Appendix.

Table 2-3 Total Halibut IFQ Hired Skipper Activity (HS) 2020-2024

Year	Landings by HS	Landings	% HS	HS Delivering	HS with QS
2024	3,212,956	13,626,400	23.6%	138	94
2023	3,731,167	14,697,704	25.4%	144	95
2022	4,612,683	17,054,052	27.0%	151	100
2021	4,528,980	16,743,437	27.0%	149	102
2020	4,116,151	14,548,488	28.3%	162	117

Figure 2-10 Sablefish IFQ Landings by Hired Skipper (HS) 2015-2024

2.4 Registered Buyers and Landings

The number of registered buyers and the number of active buyers is presented in the below table for 2020-2024. Registered buyers are able to hold multiple permits; however, multiple permits are not listed on the bought IFQ potentially causing some of the difference between registered buyers and active buyers. An active buyer is identified by a registered landing associated with the buyer. The number of buyers significantly increased in 2024 with the highest number of buyers since 2019.

Table 2-5 Registered Buyers of Halibut and Sablefish IFQ

	Buyers	Active Buyers	Halibut Buyers	Sablefish Buyers

3 Initial Issuee QS Holdings, IFQ Transfers, and Community QS Holdings

3.1 Quota Shares held by Initial Issuees

Table 3.1 presents the amount of quota shares held by initial issues in the halibut and sablefish IFQ fisheries, and indicates the annual changes of holdings over the 2015-2024 period. As expected, the amount of quota shares held by initial issues will decline over time as persons exit the IFQ fisheries. In general, the amount of decrease shows an increasing downward trend, with the change from 2022-2023 as a relative outlier. Tables that present initial issuee holdings by regulatory area are available in the Appendix. The number of initial issuees of halibut quota was at 885 in 2024 showing a consistent downward trend from 2015 when there were 1,200 halibut QS holders who were initial issuees. Sablefish initial issuees also shows a downward trend with 238 in 2024 down from 341 in 2015.

Table 3-1 Year over Year Change in Halibut and Sablefish Initial Issuees QS

Year over Year	Change in Halibut Initial Issuee QS	Change in Sablefish Initial Issuee QS
2023 to 2024	-7,424,301	-5,322,568
2022 to 2023	-2,210,677	-1,624,117
2021 to 2022	-7,131,799	-8,083,662
2020 to 2021	-6,495,788	-2,617,644
2019 to 2020	-4,971,565	-7,945,554
2018 to 2019	-5,827,545	-6,666,510
2017 to 2018	-2,308,230	-2,341,060
2016 to 2017	-3,678,562	-6,120,594
2015 to 2016	-4,631,348	-2,840,551

Figure 3-1 Halibut QS Held by Initial Issuees

Figure 3-2 Sablefish QS Held by Initial Issues

3.2 Medical Transfers

Table 3-2 shows the total number of medical transfers of halibut and sablefish IFQ by year. The number of persons transferring and receiving IFQ is also shown. Excluding 2021, which was affected by an emergency rule that temporarily changed the criteria for medical transfers, the time series shows an increasing trend in the number of transfers starting in 2020; however, that trend appears to have stabilized in 2024.

Table 3-2 Medical Transfer of Halibut and Sablefish IFQ

Row Labels	Transfers	IFQ Transferred	Persons Transferring	Persons Receiving
Halibut				
2024	469	2,652,861	322	196
2023	477	2,810,910	320	195
2022	434	2,883,788	291	192
2021	74	396,271	57	45
2020	413	2,133,048	292	166
2019	262	1,324,546	175	125
2018	236	1,103,787	162	122
2017	217	1,064,555	133	101
2016	184	815,111	126	98
2015	133	564,303	94	78
Sablefish				
2024	174	5,058,187	118	95
2023	188	6,336,776	129	104
2022	179	5,294,200	122	95
2021	28	879,074	21	19
2020	166	2,996,102	115	79
2019	121	1,636,863	83	65

2017	88	972,889	58	51
2016	68	651,128	49	38
2015	46	470,833	37	35

Source: NMFS Restricted Access Management (RAM) division sourced through AKFIN

3.3 Non-Medical Temporary Transfers

Temporary non-medical IFQ transfers typically consist of transfers to surviving beneficiaries, transfers from Community Quota Entities to qualified persons, and transfers due to military service. Additionally, in years of low halibut abundance, temporary IFQ transfers to Community Development Quota (CDQ) groups are allowed in Areas 4B, 4C and 4D. The time series in Table 3-3 also shows the effect of emergency COVID transfers that occurred in 2020 and 2021. The emergency transfers occurred due to issues with prosecuting the fishery, not medical issues. Excluding these two emergency rule years, the trend for non-medical temporary transfers has consistently increased; however, 2024 showed a reversal of the trend for sablefish IFQ. The level of temporary non-medical transfers for sablefish IFQ decreased to levels last seen prior to 2020.

Table 3-3 Non-Medical Temporary Transfer of Halibut and Sablefish IFQ

	Transfers	IFQ Transferred	Persons Transferring	Persons Receiving
Halibut				
2024	81	443,256	43	58
2023	71	434,386	41	56
2022	77	522,461	41	54
2021	905	4,815,906	608	311
2020	464	1,986,097	322	200
2019	59	391,739	26	45
2018	61	355,001	29	47
2017	63	380,074	24	48
2016	42	274,802	25	27
2015	47	265,436	26	32
Sablefish				
2024	19	688,902	12	13
2023	34	1,580,142	21	25

2016	23	255,709	14	16
2015	24	257,933	11	16

Source: NMFS Restricted Access Management (RAM) division sourced through AKFIN

3.4 Community Quota Entity Activity

The amount of CQE IFQ landings for all areas is shown in the table below. The Community Quota Entity (CQE) IFQ Program allows eligible communities to hold and lease halibut and sablefish quota share (QS) on behalf of local residents. The program enables non-profit CQEs to purchase and manage QS, which they lease to community-based fishermen. Unlike individual QS holders, CQEs can retain and distribute quota indefinitely. The program primarily benefits communities in the Gulf of Alaska. In order to avoid

confidentiality concerns sablefish and halibut are listed together. The landings that are derived from CQE in the recent 3 years represent the three highest years on record.

Table 3-4 CQE Landings of Halibut and Sablefish IFQ

Year	Landings
2024	332,929
2023	391,885
2022	451,705
2021	247,126
2020	97,901
2019	158,700
2018	293,391
2017	100,429
2016	118,972
2015	87,887
2014	87,382
2013	14,135

Source: NMFS Restricted Access Management (RAM) division sourced through AKFIN

3.5 Quota Share held by Community

The following tables represent the fishery management plan sub-area where quota share (QS) owners reside and the amount (in millions) of their QS units. Tables with specific communities are in the Appendix, communities with less than three QS holders are shown grouped under the (blank) category. Both halibut and sablefish quota ownership by community shows a trend toward increasing Alaska ownership and away from Oregon, Washington and other states.

Table 3-5 FMP Area of Halibut QS Owners Residence

	Alaska							States			Total
