

SAFE Guidelines with respect to reporting management quantities – DRAFT

Updated: August 11, 2026

Below are guidelines for management quantities. Use the guidance which corresponds to the lowest reported value for an entire table.

For Metric units:

- Report quantities greater than or equal to 10 t in **kilotonnes** (e.g., 0.010 kt) and round decimals to the thousandth place;
- Report quantities less than 10 t in **tonnes** and round decimals to the hundredth place;
- For quantities greater than 0, but less than 0.01 t, report “< 0.01”.

For Imperial Units:

- Report quantities greater than or equal to 22,000 lb in **millions of pounds** (e.g., 0.022 mil lb) and round decimals to the thousandth place;
- Report quantities less than 22,000 lb in **pounds** and round to the nearest pound;
- For quantities greater than 0, but less than 1 lb, report “< 1 lb”
