

D-4 Programmatic Evaluation

Council motion

October 7, 2025

The Council is not taking further action on the Programmatic Evaluation at this time.

The Council supports reinstating the triennial comprehensive review of Groundfish FMP Objectives as a means for adaptive management. This review should continue to provide a summary of Council activities relative to Groundfish FMP goals and objectives, providing an opportunity for the Council to consider whether to undertake additional activities to fulfill goals and objectives and/or update and modify goals and objectives.
